Deny Loveland Ready Mix Proposed Pit, concrete Batch Plant, Concrete Crushing facility

About this petition

We, the undersigned, petition the Planning Commission and Planning Commissioners to deny Loveland Ready Mix's proposal for a LaPorte Pit, Concrete Batch Plant, and Concrete Crushing facility. The proposal to allow industrial use (mining pits, concrete batch plant, and concrete crushing) is not compatible with the surrounding neighborhoods. The proposal does not benefit LaPorte, CO. We feel that the proposal seriously threatens the health, welfare, and safety of our community.

Signatures

1. Name: Laurie Davis on 2017-03-02 20:35:40
Comments: Please don't take or endanger farmland in this area by putting concrete batch plant here!

2. Name: Carol Cantrell on 2017-03-02 20:41:41
Comments: A concrete plant has no place next to a farm, much less a farm which leads the way for a new kind of agriculture which we so desperately need.

3. Name: Seth Jansen on 2017-03-02 20:43:23
Comments: A concrete plant is not a compatible use in this area. It is far too close to residential neighborhoods and working agricultural land.

4. Name: Erich Whisenunt on 2017-03-02 20:47:58
Comments: no good. not needed. please no

Comments: This would adversely effect adjacent farmland. We should be trying to encourage and support local food producers.
-
18. Name: Debi Allenson on 2017-03-02 23:59:36
Comments: Here we go again. This is completely incompatible with our community, just as the one that is still floating around out there, just to the north of this property. Allowing this would create a doorway for an even larger operation to go in just to the North, running all the way over to the bypass. Let's all let the County know we won't stand for this to happen in our neighborhoods.
-
19. Name: Linda Berlin on 2017-03-03 00:02:13
Comments: I do not live in Colorado, but will be moving there, since my son and family live there....My areas of choice are Fort Collins and La Porte,(which I think is a quaint, interesting small town). I do not think it wise to put a plant of any type that can impact the resident's health or well being, so close to communities that are already there. I am sad that I might have to rule out LaPorte in my home search, even though I think it is a really nice place to live. I am sure that there are many other areas, outside the general population areas where such a pit can be placed. Right in LaPorte, within a short distance to homes and the Elementary School ?? is unbelievable.

Comments: This is as incompatible a land use as it gets. The health, well being, and quality of life of residents is at stake. This does not serve the community of Laporte in any way and threatens many local business as well as home values. This should be conserved as open space farmland.

Comments: I live exactly one half mile due east of this proposed site on Farview Drive. We have lived here since 1984. There is already a new site for concrete operations just north of the hi-way 287 bridge over Taft Hill road, one quarter mile north from us, as well as the giant Martin-Marietta gravel and asphalt batching plant a mile south. Noise from machinery and roaring trucks abounds from these sites and the bike lanes are full of axle breaking cobbles, debris, loose gravel and mud from the incessant, often uncovered, truck traffic in and out of these sites. No one ever cleans up this mess! These current mining/mixing operations are bad neighbors that litter our roads (a major cause of broken windshields, bent rims, and environmental dust) pollute the air with diesel fumes, dust and asphalt stench, while decreasing travel safety with relentless truck traffic. Why on earth would anyone choose to permit MORE of this activity that will further adversely affect the area. Eventually the 287 corridor construction update will be over. Perhaps this new facility is being proposed for more conveniently damming the Poudre river in the near future? We need smart land use policies rather than policies of greed that will further lay

to waste this threatened but beautiful piece of the Front Range. This land is better kept as rural open space/pastoral or low density housing land use than heavy industrial!

33. Name: Sarah Lupis on 2017-03-03 17:23:25
Comments: I care about local farming. This proposal does not benefit our Northern Colorado community. Deny this proposal.
-
34. Name: Elizabeth Nance on 2017-03-03 17:47:47
Comments: This is completely counterintuitive with the quality of life we have in Fort Collins and Laporte and the reputation we hold as a healthy place to live and raise children. Fort Collins is consistently rated by many publications as being one of the best places to live in the US...this cement plant would not enhance that reputation but degrade it!

Comments: I have lived in Laporte for 32 years and I truly love Laporte, my home, my trees, and the community (for those who FaceBook I hear that there is an "I Love Laporte" FaceBook page). Very few people received notification of this proposed operation in the center of Laporte directly north of the Plantorium (Larimer County only notified property owners within 1500 feet - .28 miles- of the upcoming community meeting to discuss the proposed operations). We need to pack the gym at Cache La Poudre Junior High on Tuesday March 7th at 6:30 pm. It breaks my heart to think about being forced to move if this operation happens since I have not found a better place to live. I will not be able to tolerate the change. I need peace and quiet that is filled with nature sounds. The concrete crushing will cause vibrations impacting foundations and probably my trees. Ground water changes will impact our crawl spaces, trees, and wells. Our neighborhoods are tired of mining companies not doing what they say they will do, and are very concerned about the silica pollution. Our community enjoys the moon and stars in the night sky (hardly anyone has outside lights), we open our windows to let fresh air in (most people do not have air conditioners). I do not want to be forced to move by a new inconsiderate neighbor who does not understand our ways, our history, and our love of our town.

Comments: As a citizen of Larimer county and a vegetable farmer who both lives and works in close proximity to the proposed plant, I am very concerned about negative impact on the health and well being for my family, farm, and employees. The proposed plant will reduce my property values and decrease the quality of life for myself and my neighborhood. As someone who makes a livelihood selling organic produce to citizens in this county, I worry that the proposed plant will negatively impact the farm operation and the quality of the food grown on the organic farm. We as a farm have a commitment environmental stewardship, and to providing clean, healthy, local produce. If the proposed plant were to be permitted, I fear that citizens will loose access to this wonderful community resource. Please do not allow Loveland Ready Mix to build a cement batch

plant or crushing operation in Laporte. The negative impacts for the community far outweigh the small financial gain for the company.

Comments: I have been purchasing organic vegetables from Native Hill Farm for 6-7 years now. This farm is practically next door to where Loveland Ready Mix wants to build a batch plant and concrete crushing facility. Pls don't let that happen. I think it would greatly harm this sustainable organic farm land which provides the best produce in Northern Colorado, possibly the state, to hundreds of families in the area, both summer and winter.

Comments: We do not want/need and cement plant in Laporte, not to mention right next to Native Hill Farm, where I and many other locals, buy their fresh produce during the summer time. Let's keep our air, farms, and town free of additional contaminants and excess noise that would destroy what we all love about living in Laporte.

168. Name: Megan Maiolo-Heath on 2017-03-05 15:58:09
Comments: As a citizen of Larimer county, I am very concerned about the Loveland Ready Mix proposed cement plant in Laporte. In addition to the plant reducing property values and decreasing the quality of life for citizens in the Laporte area, I am also concerned about my neighboring vegetable farm. As someone who supports the organic farm by purchasing and consuming their vegetables, I worry that the proposed plant will negatively impact the farm operation and the quality of the food grown on the organic farm. I not only support the farm for their commitment to environmental stewardship, but also for the clean, healthy, local produce that they are able to provide for me and my family. If the proposed plant were to be permitted, I fear that I will loose access to this wonderful community resource. Please do not allow Loveland Ready Mix to build a cement batch plant or crushing operation in Laporte. The negative impacts for the community far outweigh the small financial gain for the company.

Comments: Please do not allow the health, safety and quality of life in our community to be degraded. The proposed gravel pits, permanent crusher and cement plant will be directly next to the community of Laporte and a school and dense housing areas. I worked on the road and reservoir on Cameron pass in the 70s, and I know the intense noise level of the the crusher. Residents, including me, would have to wear ear plugs all the time, as do the crusher operators. The ears of the children and adults in the neighborhood would be very negatively impacted, as would the air, water, property values and quality of life in the community of Laporte. The neighboring organic vegetable farm, one of the most successful in the area, would most likely be forced out of business due to the negative environmental effects of the facility. There is no way this proposed industrial operation should be allowed in a dense housing area, and so close to a school. The health and welfare of the community is so much more important than the financial gains of one company. PLease deny this request and do not allow the heath, safety, and quality of life of our community to be destroyed. Thank you!

Comments: Sixteen years ago, my wife and I made a choice to settle in Larimer County and felt that it was the right place for us to set roots and create our family. The local community, along with its resources and amenities are important to us. As a citizen of this community, I am very concerned about the Loveland Ready Mix cement plant that has

been proposed to be located in LaPorte. Our family relies on the organic produce that is grown adjacent to the proposed concrete plant and crushing facility. We feel strongly that this proposed concrete operation will negatively effect not only the LaPorte community due to the incessant noise pollution, but will also negatively impact those of us in Fort Collins and Northern Colorado who rely on the farms in that area that provide many of us with the cleanest and highest quality organic produce that can be found. Please do not allow Loveland Ready Mix to build a cement batch plant or crushing operation in LaPorte.

-
268. Name: Phyllis Hunt on 2017-03-06 20:39:28
Comments: Please deny Loveland Ready Mix's proposal for its LaPorte Pit, Concrete Batch Plant, and Concrete Crushing facility. It's an inappropriate site for the many reasons that have been cited. A question: are the numerous sand and gravel operations in the Fort Collins area supplying materials for the dangerous fracking going on in Weld County that is contaminating the environment and endangering human health?
-
269. Name: Trevor Bush MD on 2017-03-06 20:45:41
Comments: I am a fifth generation Larimer County Colorado native and local family physician. The cement sector is the third largest industrial source of pollution, emitting more than 500,000 tons per year of sulfur dioxide, nitrogen oxide, and carbon monoxide. Most importantly the effects of these toxic substances will undoubtedly affect our growing and developing children. This has been clearly shown and successfully litigated many times unfortunately in retrospect. Given the population growth and those already settled around this area including two schools it is nothing short of criminal to proceed and should be opposed aggressively.

Comments: This plant will have a huge impact on not only the health and quality of my food but will also have a huge impact on all the surrounding farmers and nursery. Please consider the many negative environmental impacts; irrigation water quality and air quality as well as the surrounding property values.
-
276. Name: Owen Richard on 2017-03-06 22:31:55
Comments: Please do not permit this cement plant, it's in a sensitive area that is best left to the wild or light agriculture.
-
277. Name: Thomas Catlow on 2017-03-06 22:39:16
Comments: Just NO!
-
278. Name: Brian Thompson on 2017-03-06 22:42:00
Comments: Please do not approve this land use. It is incompatible with the surrounding current uses. Placing a cement plant next to a farm will effectively deteriorate their ability to farm the land. I understand the need to gravel mine the area, but a concrete batch plant does not need to be there.

294. Name: Kelly O on 2017-03-07 01:53:49
Comments: I moved to Laporte about 20 years ago because of the small town it is, and the convenience to the larger town of Fort Collins. I liked the quiet and the fact

you were far enough away from town to see the stars at night. My understanding is the noise level will be very loud and run well into the night, or all night as needed. Your response will probably be the noise levels are acceptable, but have you ever been somewhere where its so quiet that every sound is magnified? That's Laporte! You can sometimes even hear the train whistles from Fort Collins. That crossing is 7 miles away. So believe me when I say we will hear it loud and clear, especially as it bounces off the nearby hills. They will need lights to see at night also. Good-bye night sky. So there goes my safe, quiet and peaceful haven and my relaxing nights on my deck looking at the stars. There had to of been other choices for where to locate this besides right in our backyards. There is so much open space out this way, why did it have to end up literally in town. Can we just make it a gravel mine and leave the rest out of it.

Comments: Please don't approve this build.
Farmers first!!
-
297. Name: Kimberlee Berlin on 2017-03-07 02:42:43
Comments: Please do not approve this project. The proposed site is only a mile from our children's elementary and middle schools, which is a big concern. Laporte is a quiet small town, full of family neighborhoods, farms, natural areas, trails, and the Poudre River! This project would bring too much dust, noise, and light pollution; too much toxic exposure to silica; and too much heavy truck traffic for our lovely small town!

Comments: A LaPorte Pit, Concrete Batch Plant, and Concrete Crushing facility may be suitable for other locations, but not here. The proposal to allow industrial use (mining pits, concrete batch plant, and concrete crushing) will negatively affect many things LaPorte has to offer. I urge you to reconsider the proposal. Please do not allow a facility to degrade LaPorte and the surrounding community.

310. Name: Patricia Miller on 2017-03-07 04:00:16
Comments: I have been buying produce from the Native hill farm stand for several years and appreciate the healthy food and convenience offered in LaPorte. Recently I learned of the plans to mine gravel and mix cement next to the farm and am concerned about how these operations will impact the quality of crops grown here. Have any studies been completed showing chemical analyses of the cement products and possible routes of soil contamination due to runoff, etc? Please inform the public how these issues will be addressed.

Thank you,

P. H. Miller

312. Name: David Freeman on 2017-03-07 04:02:14

Comments: Building this type of facility in this location makes no sense given the nature of the surrounding community. We are already dealing with the noise, traffic, and harmful emissions from the Martin Marietta asphalt plant a short distance to the south on Taft Hill Road, and this proposed facility would further compromise the quality of life and health of those living near it, not to mention its harmful affects on Native Hill Farm, the organic farm adjacent to the proposed facility that provides quality produce for many in the surrounding area. I urge you to deny this proposal and show that you value the rights of the people of this area to a quiet, clean, and healthy neighborhood.

325. Name: Heather L Watson on 2017-03-07 04:55:43
Comments: This is IN OUR NEIGHBORHOOD, OUR TOWN. Would you want this across from your house, quiet business, or retirement community? I can not believe the site that has been suggested. You will devastate our peaceful nook in an ever louder and chaotic world. Please don't change the culture and history of this area. It is special to so many of us and would affect local families, businesses, and property owners in a negative way. It can not be worth the big dollar to place this loud, large, disturbance within our small community. Please try. There must be other open areas away from our town. I am not big business. I am local. I have supported this community, my community, for nearly two decades. I am raising my children here. What does Laporte stand to gain from this proposal? And, at what loss? The noise alone is unimaginable and will be heard throughout the quiet neighborhoods. The dust with our strong winds will cause health problems. Please deny this proposal and do not let this idea go any further. Save my peace of mind for my young children who understand why we bought into our local CSA. Other than offering a political activism lesson for my kids and a cause to fight against, I can not thank you.

326. Name: Alicia Ernest on 2017-03-07 04:57:19
Comments: I am a Laporte resident and strongly oppose this proposal. I have young children growing up in this neighborhood and worry about air quality. I buy and eat produce from the local, sustainable farms in this area and worry about soil pollution. I travel CR54G and worry about an increase in traffic that these roads would not safely support. The soil, air, traffic, noise, and light pollution do not serve this residential area. Please oppose this proposal. It is not the right location for a cement facility.

443. Name: Jerry Kvasnicka on 2017-03-08 16:26:29
Comments: This proposed plant will negatively impact the quality of the vegetables

produced at a farm next door.

444. Name: Joaquin Negron on 2017-03-08 17:14:58
Comments: A concrete crushing, or any kind of concrete facility near farms and water reservoirs is an ecological disaster in the making. The amount of highly toxic chemicals that will be released into the nearby environment is a threat our food supply and clean water. Please let's act as responsible stewards of our environment by denying this proposed pit. Let's be responsible for the impact of this decision on future generations. Deny this pit.

Comments: I am very concerned about the Loveland Ready Mix proposed cement plant in Laporte. The plant is proposed to be located right at the entrance of our community, threatening to reduce our property values and most definitely decreasing the quality of life for citizens in the Laporte area. The proposed location is at the very entrance of town and sends the wrong message about our community. As we continue to see more and more young families move into the area, we hope to see positive growth and infrastructure that engages people in our community- growth similar to the new building on 54G and Overland Trail that will be a gathering space for residents. The cement plant will do the

exact opposite. I implore you to say NO. No to the decreased air quality. No to the increased noise pollution. No to the increased traffic on 54G. I am also concerned about my neighboring vegetable farm. As someone who supports the organic farm by purchasing and consuming their vegetables, I worry that the proposed plant will negatively impact the farm operation and the quality of the food grown on the organic farm. Please do not allow Loveland Ready Mix to build a cement batch plant or crushing operation in Laporte. The negative impacts for the community far outweigh the financial gain for one privately owned company.

467. Name: David Elliott on 2017-03-09 02:43:53
Comments: Big business coming in and damaging small groups of people trying to live free of the very thing that is trying to move in. The community was already there and established before this company tried to move in. The very basis of the company would damage and undo everything that this community is trying to live for. IE organic self sustaining living. Do not bring poison to a community that does not want it. This is inhumane and I feel devalues if not violates our right to pursue happiness. The right to pursue happiness is a human right and not a corporation right. The needs and desires of the community directly effected, should outweigh the desires of a business.

Comments: The negative out weighs the positive! The hundreds of families, farms, animals, wildlife, beautiful quiet community this will effect. There is just too much negative impact on the Laporte area and areas beyond. Not only does this affect Laporte but how about all others that have to travel 54G daily from Bellevue, Rist Canyon, Lory State Park, and many others that pass though daily. As you see this is the only main though far for many. This is just the traffic portion that will be a very bad thing. Many other negative points that will harm our community is, pollution (noise, air & water) again not only us, but also those down wind or Stream) Agricultural, Water (wells & irrigation) there already wells drying up from other pits in area. Schools, businesses in area. Wildlife, wetlands, And what happens with the little cache la Poudre , many of us depend on this for run off durning storms for we don't flood above the plan pit area.
People that live in the area came here to get away from noise, pollution, traffic, and to enjoy the farm, mountain quiet beauty, how many horses will you see being riden down Main Street with big trucks passing by? None, which happens often now.
Your taking away our community that we moved here for!!!! This is not a fair thing to impose on our LaPorte Community. I say NO! There must be a better way! We are already being surrounded by pits. Enough is enough!

Comments: Please do not allow a concrete batch plant, gravel mining pit, and concrete crushing to be allowed in LaPorte. We already have enough pollution, excess truck travel and debris in the roads in our neighborhoods due to the Martin Marietta Asphalt plant just south of this location. This plant alone is causing known and unknown pollution, and exposing the children in schools surrounding this location to harmful toxins. Our ELECTED officials (commissioners) need to listen to the voters and forcefully oppose this NEW polluter of our area.

491. Name: Benjamin Smith on 2017-03-14 12:05:05
Comments: I am a community physician with deep ties to the social service, agricultural, and educational communities in Northern Colorado.

Please consider this request to deny approval for the development of this facility. Allowing this level of industrial activity within such proximity to homes and family farms has the potential to disrupt well-being during all phases of the project. From the increased traffic and environmental impact during construction, to the long-term trucking routes that will service it, to the lost opportunities to develop this in a community-oriented manner, this proposal puts narrowed interests first and people at risk.

Comments:

498. Name: Melissa Buderus on 2017-03-19 00:28:20
Comments: My mom, sister and little bother live directly to the west of this proposed site. Just on the other side of a barbed wire fence. My elderly mom cares for my autistic little brother who has sensory sensitivities as well as anxiety. When she moved there almost 16 years ago it was with the intent of providing an environment where my brother could feel safe and comfortable. My mom is aging and though she continues to support my brother, my sister built her own home here as well. She supports both my mom and brother and has physical disabilities of her own. She has allergies and at times severe asthma. This proposed quarry and concrete plant will not just disrupt their way of life, it could destroy it. Not only could they face a myriad of health issues to compound what they are already dealing with, they could lose their financial stability. This is not a fair and just proposal. Loveland Ready Mix Concrete can decimate the land elsewhere, where there is not a community of people who breathe, live and work each day.

499. Name: Kristina Cash on 2017-03-21 04:20:48
Comments: I am adamantly opposed to a cement batch plant in our area and am extremely concerned about potential hydrological issues and ground water contamination as well as contamination of Dutch water used on neighboring farmland. This is not a good idea for the health of our community present or future!

500. Name: Kristy Tucci on 2017-03-21 19:30:34
Comments: As a resident of this lovely little community I also would not see the benefit of brining this plant along with it's noise, pollution and traffic to our small town.

501. Name: Kristy Tucci on 2017-03-21 19:31:17
Comments: As a resident of this lovely little community I also would not see the benefit of brining this plant along with it's noise, pollution and traffic to our small town.

503. Name: Stephanie White on 2017-03-21 23:04:06
Comments: As a CLP Elementary and Middle School family, I would ask that the health of the children at school, on the playgrounds, and at sports practice be placed center stage on this issue. In addition, the increase in truck traffic with children crossing the street and walking home should be considered. This business would be so much more appropriately placed outside of town.
-
504. Name: Paul Tucci on 2017-03-24 19:16:22
Comments: LaPorte is a growing family oriented community and the last thing it needs is another cement plant. Keep our community a quiet residential and safe home site. NO CEMENT PLANT PLEASE!

508. Name: Carlos Konstanski on 2017-03-25 00:52:11
Comments: Laporte needs businesses that will vitalize the town, not turn it into an industrial crap-hole. Property values will go down; literally millions of dollars will be lost by homeowners while this one company makes a profit. This type of capitalism is getting awfully old. I went to the town meeting, and I saw firsthand how vehemently opposed every single Laporte resident is to this awful idea.
